

SCHULZE - BRAKEL

Expertise in Windscreens

Plastic Flags with and without Logos

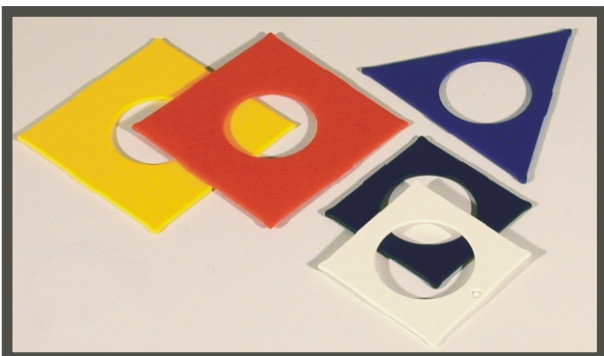

85x85x55mm

63x63x52 mm

100x50 mm

We offer you flags in the standard colors black, white, blue, red and yellow.

Special colors are also available upon request.

Our graphics department can create logos according to your specifications. We do so with the same high quality, with which we produce logos for decorated windscreens. Alternatively, you can also source and attach the logos yourself.

Each flag can be used with a great variety of microphones, with the help of differently sized foam inserts. We can also provide you with a plastic cover for the bottom of the flag, with which the flag can be easily closed.

Development, Production and Delivery

We produce plastic flags in three standard sizes and in the colors black, white, blue, red and yellow.

Of course, we can also provide you with flags made out of foam in your desired sizes. We produce neutral windcreens and those with decoration highlighting a particular radio/TV station.

We recommend our tried and tested decorated windcreens. They are easy to handle, and competitors cannot easily cut out your station's logo from the picture.

In Germany and Austria, we distribute our products directly to our customers. In those countries, in which we have an official representative, our products can only be bought from this representative for the same price. If you have questions, contact us or consult our webpage!
