

SAFECOPY

COPY OF CATEGORISED AUDIO IN DEDICATED FOLDER

Over safecopy the audio files from chosen category will be extract in regular time interval.

Every time scheduled interval, the audio is copy for each category in a folder. So it will be easy to find the audio item in its folder.

With the extraction the audio files will be clearly named by putting as filename the name – title.

This informations are taken from database.

SAFECOPY is used as security backup for jingle and trailer, to be used in direct drop from folder in cart when database is not accessible.

Copy process can be done on a scheduling. This reduce the network traffic for category where the rotation is not important (like jingle).
