

VOICE TRACKING

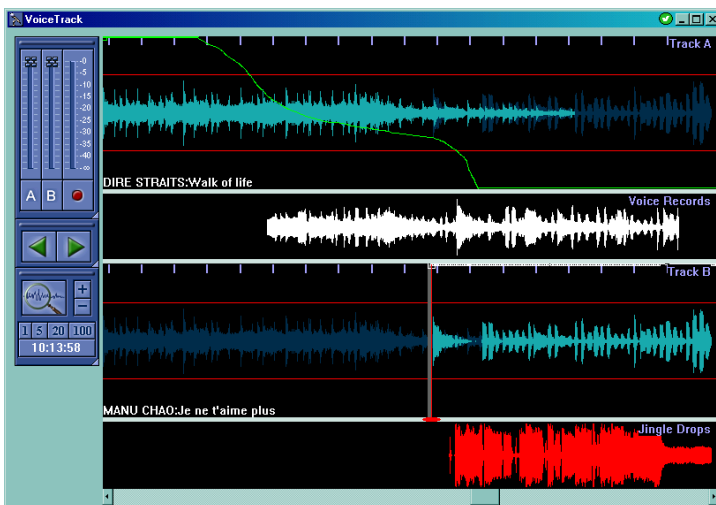

Give your Automation a Live touch

15:00:00	(Empty)	Begin of bloc (15:00 - 15:10 of type(s) musique (100%))
03:33	THE WATERBOYS	glastonbury song
03:04	MORCHEEBA	be yourself
02:40	RENAUD	Mistral gagnant
00:50 03:25	JIMMY CLIFF	Reggae street
15:12:36	ROBERT PALMER	Every kinda people

- select a title in the scheduler, also the current on air,
- click on voice icon to transfer it in the voice tracking module,
- also over TCP/IP on a remote computer

- control the level with the mouse or the fader box connected over serial port CAT5 (adapter included).
- Real time listening to the audio level correction
- Full duplex record the voice while playing the song and adjusting the level
- Set the position of the voice and the transition by moving the file
- Drop bed or jingle on the transition
- Set position of the dropped item
- Record the voice in different audio quality that the music played
- Record in low quality for remote voice tracking over Internet

- Make a short time delay voice tracking, because all software are synchronized in real time
- Make you voice over on the actual current title some seconds before going on air
- Make the voice record on a dedicated off air editing computer synchronized in real time with the on air
- Put the voice exactly by controlling the back timing of the intro time
